

2,500 → 25

in 25 min | \$0.00 API Spend

Every claim backed by [start,end] quote – [free_fleet/grounding.py:63](#)

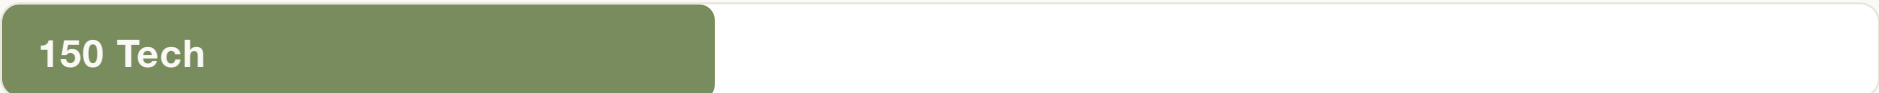

Raw Campaign Universe 2,500

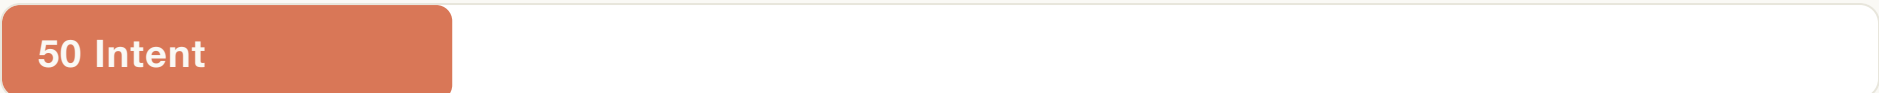

Layer 1: ICP & Firmographic Fit 600

Layer 2: Tech Stack & Architecture Pain 150

Layer 3: Hiring Velocity & Pain Reqs 50

LAYER 4 FOUNDER LANGUAGE

Sniper Accounts (Tier-1 Direct Pipeline)

→ 25 SNIPER

418 batches (15m) → 100 batches (4m)

Research suite filters 94% of raw noise before deep enrichment — via Claude/Cursor or CLI.

1 Layer 1: Firmographic Triage

418 Batches • 15 Mins

INPUT ACTION → EVIDENCE CHECK
SCRAPE_1 (Homepage & Pricing) → GATE_1 (Fit Score ≥ 70%)

GATE 1 EXCLUSION
DROP 1,900
B2C, wrong tier, out of ICP bounds

LAYER 1 ADMITTED
600 SURVIVORS
Grounded homepage proof validated

600 SURVIVORS PASSED TO LAYER 2

2 Layer 2: Tech Stack & Pain Points

100 Batches • 4 Mins

INPUT ACTION → EVIDENCE CHECK
SCRAPE_2 (Docs, APIs, Changelogs) → GATE_2 (Pain Score ≥ 75%)

GATE 2 EXCLUSION
DROP 450
Stable stack, zero competitor friction

LAYER 2 ADMITTED
150 SURVIVORS
Verbatim competitor tool cited in docs

25 batches (2m) → 12 batches (1m)

Research suite isolates hiring budget & founder bottleneck language — verbatim.

3

Layer 3: Hiring Velocity & Tech Budget

25 Batches • 2 Mins

INPUT ACTION

SCRAPE_3 (Careers, Greenhouse, Lever)

→

EVIDENCE CHECK

GATE_3 (Open Reqs Matching Problem)

GATE 3 EXCLUSION

DROP 100

No active hiring or budget allocated

LAYER 3 ADMITTED

50 SURVIVORS

Active job postings quote target stack

4

Layer 4: Founder Voice & Narrative Signals

12 Batches • 1 Min

INPUT ACTION

SCRAPE_4 (Podcasts, Founder Posts, Letters)

→

EVIDENCE CHECK

GATE_4 (Founder Cites Bottleneck)

GATE 4 EXCLUSION

DROP 25

No founder narrative trigger detected

FINAL TIER-1

25 TIER-1 SNIPER

Direct personalized outreach ready

```
bash ~ live offline proof

$ free-fleet quickstart --demo --run-id demo
✓ Deterministic demo pipeline • 0 API keys required • Validates quotes & schemas in <1s
```

The Grounded Output

Every sales claim links back to an exact character-level verbatim quote.

\$ free-fleet export demo --format csv

3 of 25 verified records

ITEM_ID	PRIORITY	PRIMARY_QUOTE_TEXT
acme_cloud	HIGH	" scaling vector search across multi-tenant clusters is our #1 bottleneck this quarter"
stripe_billing	HIGH	"seeking Staff Engineer to lead migration off legacy v1 billing pipeline "
hyper_ai	HIGH	"currently using legacy self-hosted Postgres but hitting latency limits at 50k QPS "

Run the Fleet on Your Machine

github.com/NatesVibeCode/free-fleet

STAR ON GITHUB ★

One command. No keys.

Anyone with Claude Desktop or Cursor can run the Research Suite — no CLI expertise needed.

bash — install to Claude/Cursor

```
$ pip install free-fleet
```

```
$ free-fleet mcp install --workspace-root "$PWD"
```

Auto-writes claude_desktop_config.json / mcp.json → restart app

```
$ free-fleet mcp install --dry-run --json # preview
```

```
$ free-fleet quickstart --demo --run-id demo # 0 keys, <1s proof
```

Or chat in Claude/Cursor — no terminal

In Claude: “Use free-fleet to triage `accounts.csv` for hiring intent — free-only”

→ Agent calls `free_fleet_run` → SQLite leases → verifies quotes → `free_fleet_export` → CSV
